BSc Computer Engineering

Sir Syed Univ. of Eng. & Tech.

2010-13

PROFILE

Senior Mobile Engineer with 12+ years building large-scale apps in the UAE, now transitioning to Product Management. Delivered loyalty, engagement, onboarding and payment journeys for Botim (100M+ downloads) and Abu Dhabi Islamic Bank (1M+ users), working daily with Product, Design, QA and Backend teams. Data-led (Amplitude, MoEngage, Firebase), focused on quality KPIs and regulated, security-first delivery.

PRODUCT CASE STUDY (INDEPENDENT)

Customer Lifecycle & Reverification Engine

UAE Digital Banking, PRD & UI Prototype — *Live prototype*

- Wrote a full PRD: personas, goals and non-goals, MoSCoW requirements, epics and stories, phased roadmap, risk register and success metrics.
- Designed 6 prototype screens, including a bilingual (English/Arabic) customer journey using UAE PASS.

WORK EXPERIENCE

Senior Android Engineer

Astratech (Botim), Abu Dhabi — *2025 - May 2026*

- Owned end-to-end delivery of engagement and growth features for Botim (100M+ downloads) with Product, Design, QA and Backend.
- Built the loyalty program's screens in Jetpack Compose, turning product requirements into a shipped journey.
- Integrated Amplitude and MoEngage, lifting campaign targeting accuracy by ~30% and giving Product user-behaviour data.
- Cut crash rates ~25% and owned CI/CD pipelines and nightly releases across a continuously deployable branch.

Senior Software Engineer, Android

Abu Dhabi Islamic Bank, Abu Dhabi — *2023 - 2025*

- Shipped the full ADIB Products suite (Savings, Investment Deposit, Takaful, Mazaya, Amwali) for apps serving 1M+ users and 10K+ daily transactions.
- Built a minor account onboarding journey with auto-filled details, biometric authentication and selfie liveness checks.
- Delivered secure onboarding and payment journeys with Keystore encryption, biometric auth and SSL pinning.

Senior Android Engineer

Toggle Market, Dubai — *2020 - 2023*

- Owned buyer-to-supplier purchase order and invoice flows connecting 500+ businesses.
- Built the BOQ module, cutting manual procurement effort ~40% for hospitality clients.

Software Engineer

Multi Level Technology, Abu Dhabi — *2016 - 2020*

- Shipped Android apps for Abu Dhabi Judicial Dept, Dubai Taxi and Dubai RTA, serving 100K+ daily users.
- Integrated EMV payment SDKs across 800+ POS devices with zero downtime, cutting transaction time ~20%.

Software Engineer

Wemsol Pvt Ltd (Keenu), Karachi, Pakistan — *2014 - 2016*

- Built core banking features, PIN/OTP login and local and international fund transfers for Askari Bank's Internet Banking app.
